

# ETHERMA PTXS

The linkable foot warming mat

The ETHERMA PTXS is used for local heating under a sitting or standing area. The heating mat is placed on a flat level surface and connected to a 230 V socket with the plug. The surface temperature of approx. 35-45 °C (depending on the surface) creates a pleasant comfortable temperature and prevents feet from being exposed to cold. It is important that the foot warming mat is not covered by insulating objects. The foot warming mat PTXS for laying is robust and comes with a corrugated texture coating. For use indoors such as workstations, workbenches, sales booths, shipping offices, containers, and more. . The mat can also be operated in a humid environment.

Please note that the PTXS is not laid out completely and permanently outdoors, but under light roofing. Use is recommended at an ambient temperature of 0-10 °C.

## TECHNICAL DATA

- > Voltage: 230 V
- > Surface temp: 35-45 °C
- > Surface: Grooved structure
- > Material: Rubber
- > Colour: Black
- > Thickness: 10 mm
- > Weight: 8.3 kg
- > IP rating: IP X7
- > IEC protection class: II
- > Connection cable: 2x50 cm with plug connection
- > Connecting cable: 2.5 m EU plug, type C
- > System structure: CE compliant

## PRODUCT ADVANTAGES

- + Ergonomic doormat
- + Mats can be coupled up to a length of approx. 5 m (8 pcs. with a 16 A fuse)
- + Slip resistant, non-slip
- + Easy cleaning
- + Fire protection class B1
- + Acid and lactic acid resistant

## APPLICATION AREAS

To be used for workstations, workbenches, stands, in containers and also for outdoor events such as Christmas markets.
